Get to know your iKEON Smart Outlet

Prerequisites

Before you begin

At iKEON, we strive to create the most advanced and safest power outlets. We have achieved this with our DUET & DUET+ models.

All iKEON power outlets, including the Classic series, come with Smart Active™ technology. A unique safety feature that does not allow power to flow through the outlets unless there is a plug inserted.

When you remove the plug without turning off the power outlet, iKEON's Smart Active™ technology will automatically cut the power to that outlet.

iKEON's Smart Active technology considerably reduces the risk of electrocution.

iKEON, saving one life at a time..

Warning: All electrical installations must be performed by a licensed electrician.

Unique features

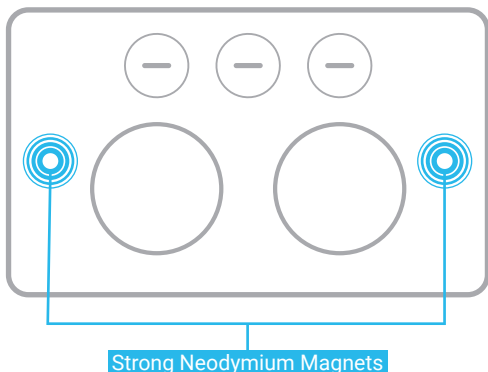

Magnetic attraction

Interchangeable Covers

Magnetic interchangeable covers

Swap, change and create interesting colour combinations with iKEON's magnetic interchangeable covers.

No matter which base colour you choose, the possibilities are almost endless.

Unique features

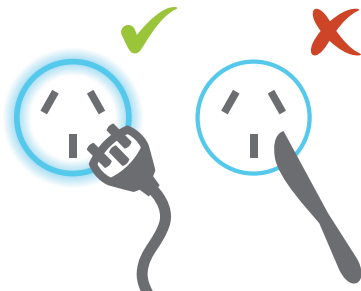

First time added in power outlets

Smart Active™ Technology

Making sure everyone stays safe

Your iKEON DUET & DUET+ are the safest power outlets available. Unless you insert a plug, the power outlets remain inactive, and you cannot turn them on.

iKEON's Smart Active Technology considerably reduces the risk of electrocution. There is no need for unsightly safety plugs anymore, as our Smart Active Technology makes sure everyone stays safe.

Other features

User Interface

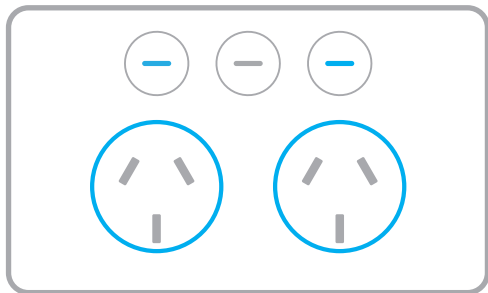

Power Outlet Illumination

Power Rings & Status LEDs.

When the power outlet is connected to power, the two illumination rings will turn on, indicating that it is powered up and operates normally.

The illumination rings act as a night light, so no more dark hallways and rooms.

The touch button LED will illuminate when the power outlet is on and a plug is inserted (See Smart Active technology).

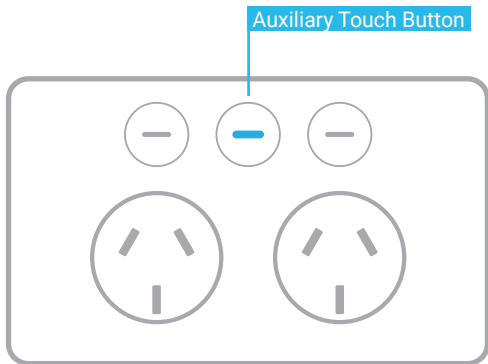

Other features

Last but not least

Auxiliary Button (Duet+ only)

More is more.

Apart from the two touch buttons which allow you to turn on and off the two power outlets, the Duet+ provides a third button to control a range-hood in the kitchen or power up a food waste disposer.

Thank you..

For choosing iKEON Smart Accessories.

We endeavour to create the most reliable, innovative and long-lasting smart products. To achieve the required manufacturing quality and precision, we designed all iKEON products in Australia and manufactured them using premium electronic components.

Tell us what you think.

Send your feedback through the iKEON App or the iKEON website. We'd love to hear from you.
