iKEON Smart Accessory

Prerequisites
Before you begin

1. Connect your iPhone or iPad to your home 2.4G WiFi.
2. Log in to your iCloud account.
3. Enable iCloud Keychain.
4. Download the iKEON app from the AppStore.

Need help with creating your iKEON home?
You can find a comprehensive guide at:
https://ikeon.com.au in the support section.
Alternatively, you can call us on **1800 900 990**

iPhone and iPad are trademarks of Apple Inc, registered in the U.S and other countries. App Store and iCloud are service marks of Apple Inc., registered in the U.S. and other countries.

Note: For security reasons, you have 10 minutes after powering your iKEON accessory for the first time to add it to your home. After the 10 minutes have elapsed, you must reset your iKEON accessory to set it up. (See Resetting your iKEON Smart Accessory).

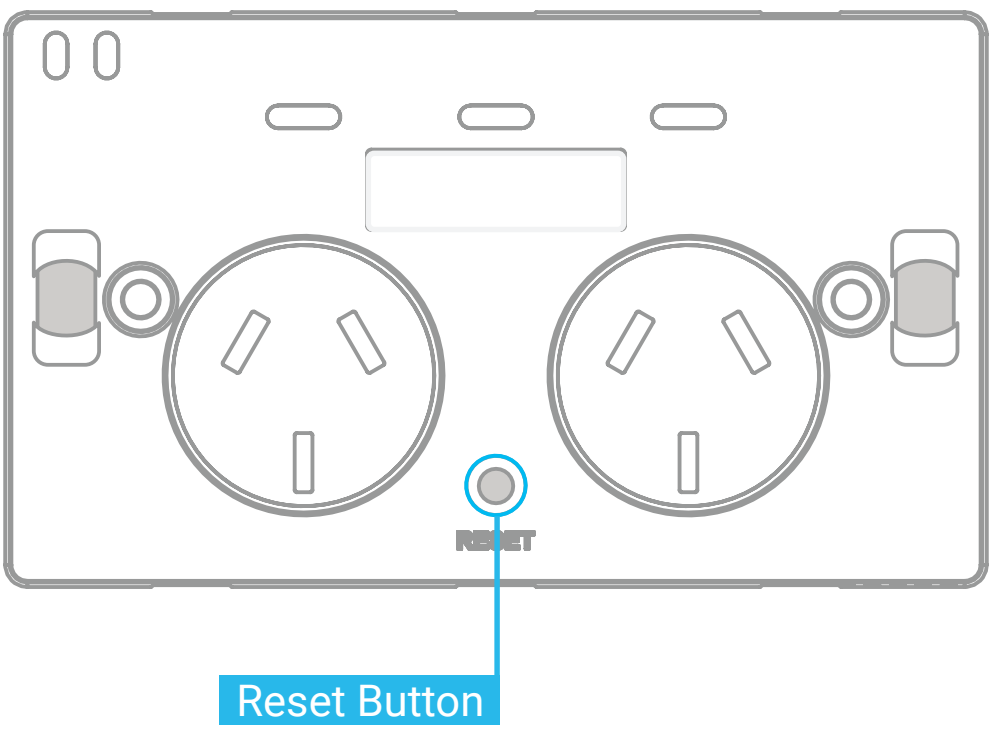

Warning: All electrical installations must be performed by a licensed electrician.

Resetting your iKEON Smart Accessory
Steps

1. Remove the front cover.
2. Locate the Reset pinhole.
3. Get a small pin.
4. Press and hold for 5 seconds.

Upon successful reset, your accessory will flash a few times.

Unique features

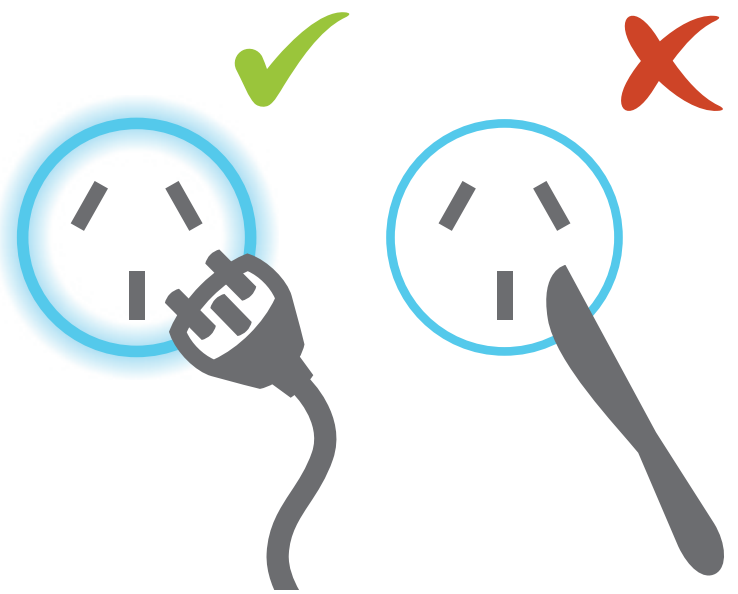

First time added in power outlets

Smart Active Technology

Making sure everyone stays safe.

Your iKEON DUET & DUET+ is the safest power outlet available. Unless there is a plug inserted, the power outlets remain inactive, and you cannot turn it on by the touch buttons on the device or the iKEON app.

iKEON's Smart Active Technology considerably reduces the risk of electrocution. There is no need for unsightly safety plugs anymore, as our Smart Active Technology makes sure everyone stays safe.

Unique features

First time added in power outlets

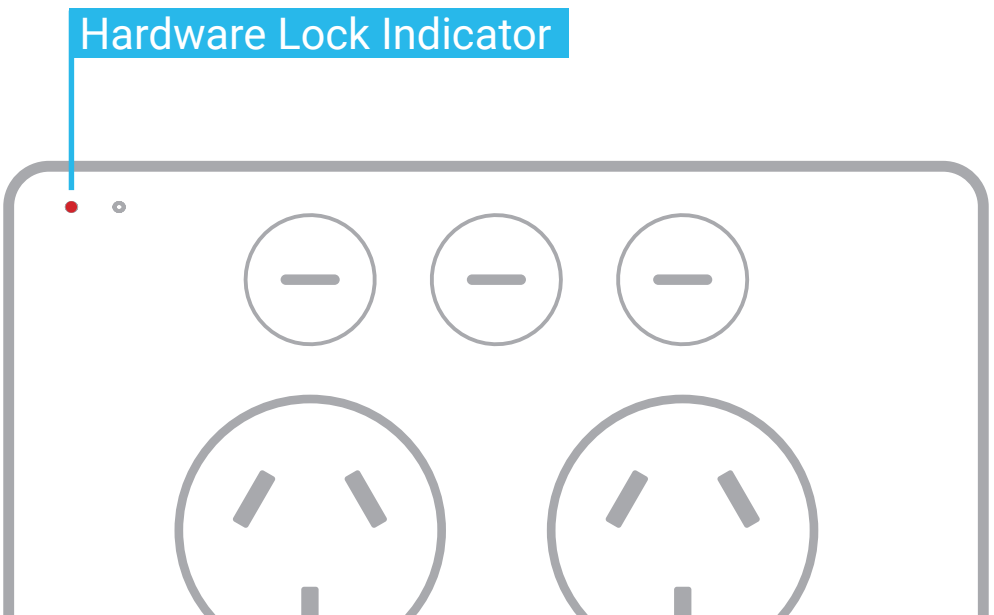

Hardware Lock System

Safety x2.

We believe that safety is peace of mind. That is why we have added another layer of safety. The iKEON App provides several intuitive ways to achieve that.

Locking a device is as easy as tapping the ‘Safety Lock’ button and entering a 4-digit key. Your iKEON accessory locks to its current state.

At a glance, you can check the lock state of your iKEON accessory by a small red LED indicator on the top left corner.

Unique features

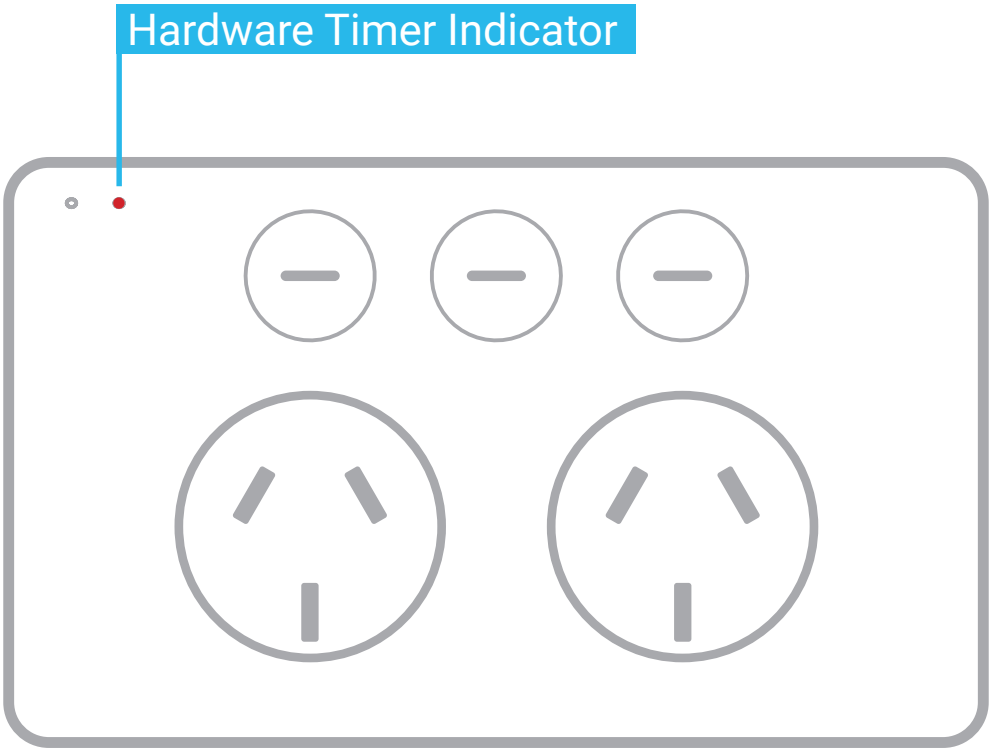

First time added in power outlets

Hardware Timer

Every second counts.

Set a timer to turn On or Off any iKEON accessory.
You can set a timer from 1 minute to 24 hours.

A small red LED indicator on the top left corner will start flashing when a timer is active, indicating that a timer has been set.

Unique features

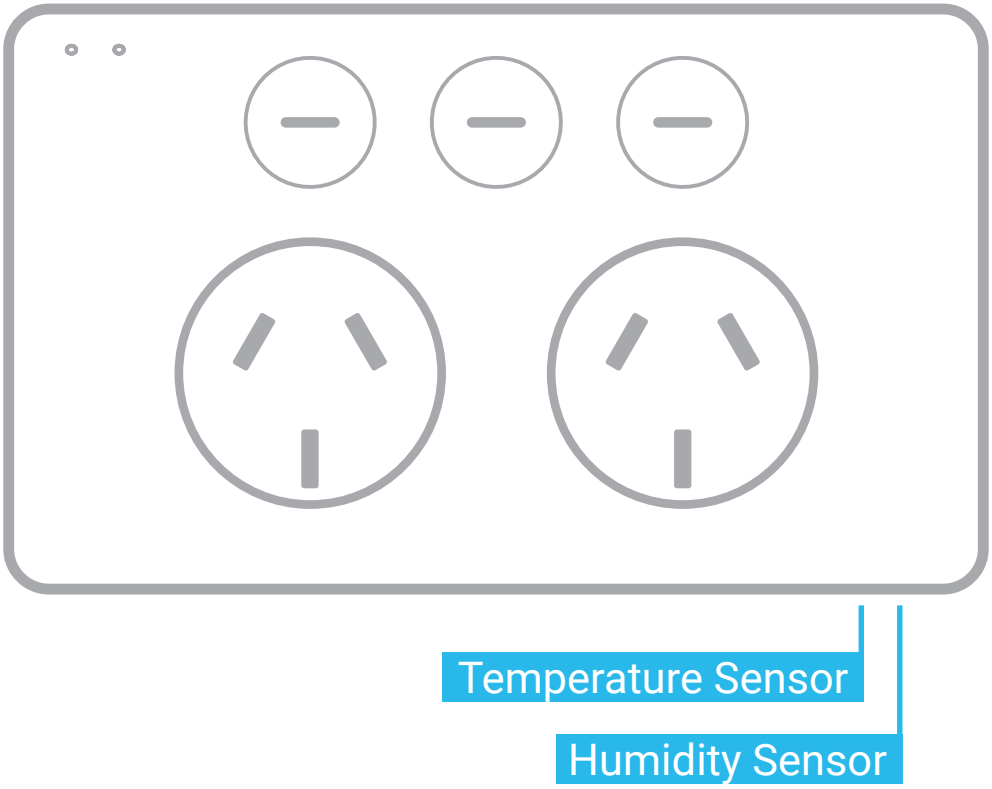

First time added in power outlets

Temperature & Humidity Sensors

Effortless comfort.

Automatically adjust the conditions in every room or trigger an automation based on temperature and humidity.

For example, turn on a ceiling fan when the temperature exceeds 26°C or turn on a humidifier when the humidity is below 45%.

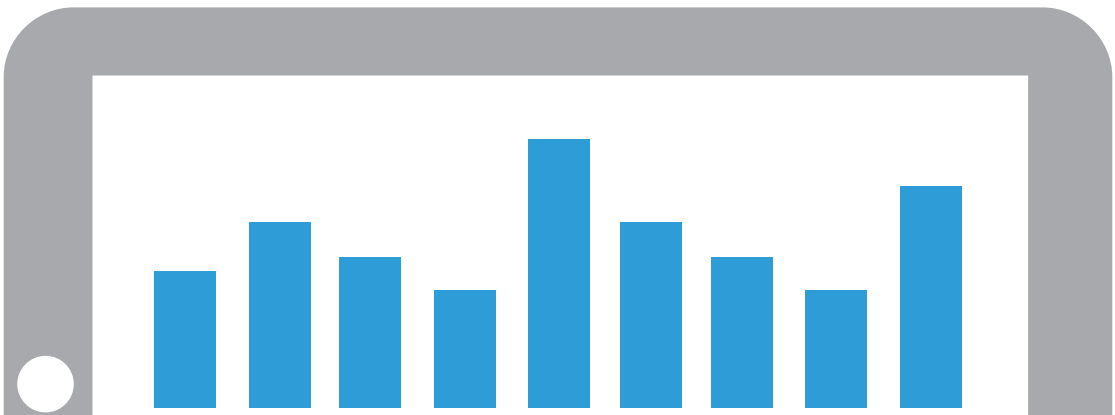

Other features
Last but not least

Power Consumption Monitor
Knowing your energy footprint.

With power consumption sensing capabilities, it's easy to monitor how much power each device consumes through comprehensive charts. Check the power consumption of each accessory, each room, the whole house or multiple locations.

With a tap of your finger, you can switch from power consumption to temperature or humidity charts for the current day, week, month or year. You can also get statistics for a specific day or a custom range.

Knowing is never enough. You should be able to export the collected data from your iKEON accessories for further processing. Export your home data to Excel or CSV format to analyse them further.

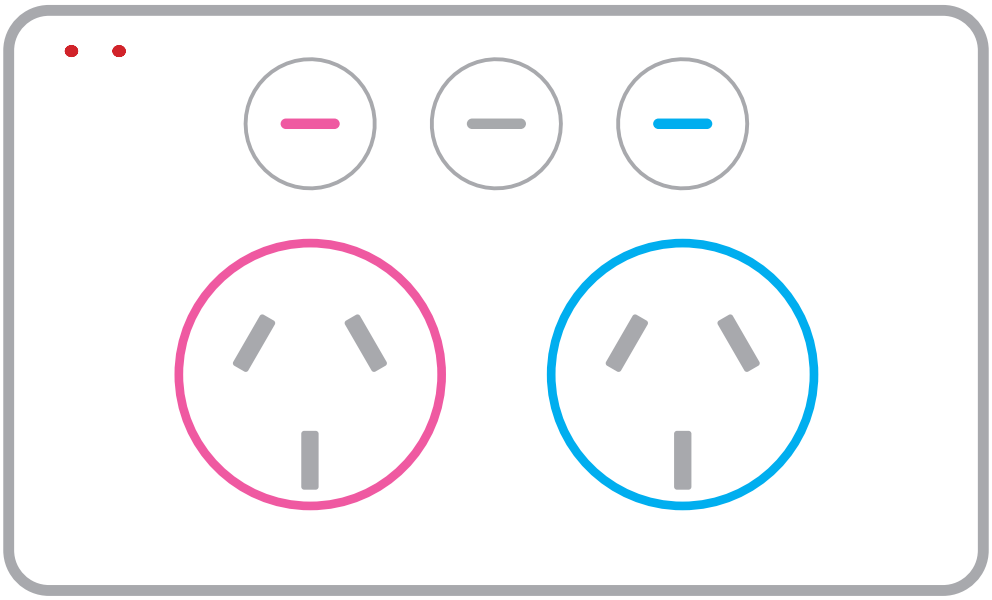

Other features
Last but not least

Multicolour Power Ring and State LEDs
Get into the mood.

Select from a virtually unlimited palette of colours, the one that expresses your mood or personality.

Change the colour of all iKEON accessories at once or individual accessories to create a seamless or playful home environment.

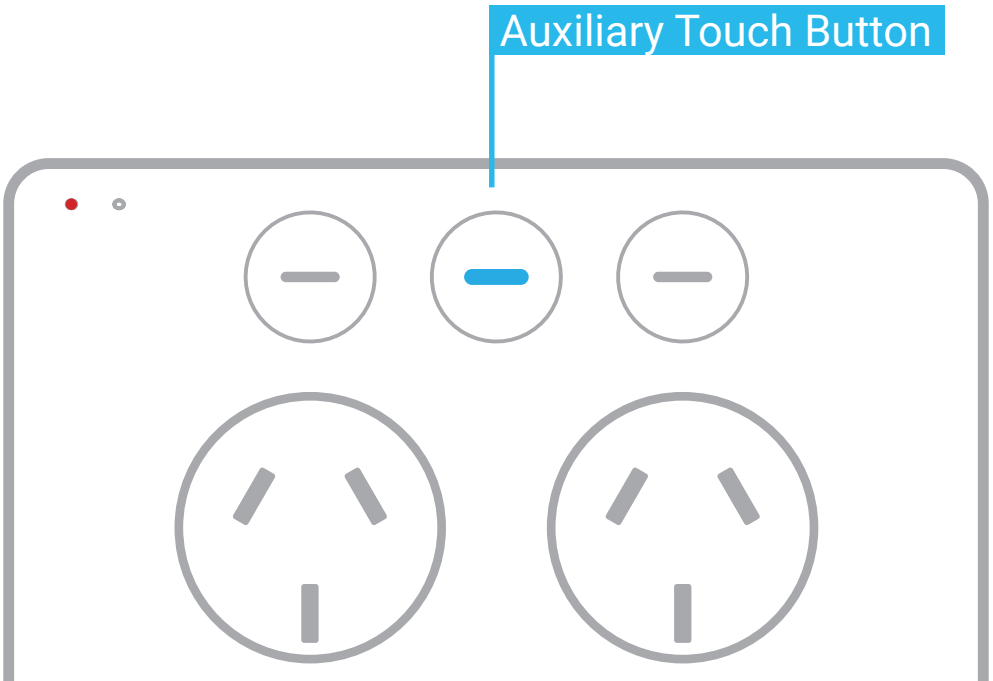

Other features
Last but not least

Auxiliary Button (Duet+ only)
More is more.

Apart from the two touch buttons which allow you to turn on and off the two power outlets, the Duet+ provides a third button to control a range-hood in the kitchen or power up a food waste disposer.

The auxiliary button can also trigger automation, run a scene or control another accessory.

You can enable this functionality and create automation in the iKEON app.

Thank you..

For choosing iKEON Smart Accessories.
We endeavour to create the most reliable, innovative and long-lasting smart products. To achieve the required manufacturing quality and precision, we designed all iKEON products in Australia and manufactured them using premium electronic components.

Tell us what you think.
Send your feedback through the iKEON App or the iKEON website. We'd love to hear from you.
